

METRIC TAPERED ROLLER BEARINGS

INTERCHANGEABLE

E...J

Indicates metric series comply with ISO standard Interchangeable cup & cone.

Prefix "H"

H indicates the bearing rings are manufactured from case hardening carbon steel for higher loading and better impact resistance.

Advanced Inner Ring Rib Design Provides Superior Roller Guidance for Better Efficiencies

Sliding motion between the inner ring flange and the roller end is the primary heat generation source. Nachi has optimized the design of this critical area to reduce heat build up

■ Best Material

■ Best Design

Best Components Support Bearing Performance

All contacting Bearing components are made from the cleanest Japanese steels. These materials increase the life of the bearings over conventional practice. Thin section, high strength stamped steel cages maximize the lubrication flow which improves the lubrication factor, ultimately resulting in longer bearing life.

METRIC TAPERED ROLLER BEARINGS
